Cymbal Meet — Admin Guide: User Onboarding

Step-by-Step Best Practices for Onboarding New Cymbal Meet Users

Version 2.5 | Last Updated: December 2025 | Document ID: CM-ADM-ONB-001

---

1. Overview

Effective onboarding is the strongest predictor of long-term Cymbal Meet adoption. Organizations that follow a structured onboarding process achieve 70%+ login rates within 30 days, compared to 35% for organizations that simply provision accounts and send login credentials.

This guide provides a step-by-step onboarding framework suitable for initial deployments, seat expansions, and acquired workforce integration.

2. Pre-Onboarding Checklist (Admin Tasks)

Complete these tasks before users receive their first communication about Cymbal Meet.

2.1 Technical Readiness

- [ ] Cymbal Meet licenses are provisioned in the admin console for all target users
- [ ] SSO / identity provider integration is configured and tested (SAML 2.0 or OIDC)
- [ ] Calendar integration is verified (Google Calendar connector or Outlook add-in deployed)
- [ ] Network QoS is configured for Cymbal Meet traffic (see Device Performance guide)
- [ ] Conference room devices are installed, firmware is updated, and room calibration is complete
- [ ] Firewall rules allow Cymbal Meet traffic (TCP 443, UDP 10000-20000)
- [ ] Desktop client is available via software distribution (SCCM, Intune, Jamf, etc.)
- [ ] Mobile client is available in managed app catalog (if using MDM)

2.2 Content Readiness

- [ ] Welcome email template is prepared (see Section 4)
- [ ] Training sessions are scheduled (see Section 5)
- [ ] Quick-start guide is localized (if applicable)
- [ ] Internal support channel is established (Slack channel, Teams channel, or email alias)
- [ ] FAQ document is prepared with organization-specific answers (VPN configuration, approved use cases, recording policy)

2.3 People Readiness

- [ ] Executive sponsor is identified and has agreed to send endorsement communication
- [ ] Department champions are identified and briefed (see Best Practices Guide)
- [ ] IT help desk is trained on Cymbal Meet L1 support (basic troubleshooting, account issues)
- [ ] CSM is informed of onboarding timeline and target user count

3. Onboarding Timeline

Standard Onboarding (New Deployment)

Day	Activity	Owner	Success Metric
Day -7	Executive sponsor sends announcement email	Executive Sponsor	Email sent to all target users
Day -3	IT deploys desktop client via software distribution	IT Admin	Client installed on >90% of target machines
Day 0	Welcome email sent with login instructions and training schedule	IT Admin / Comms	Email delivered to 100% of target users
Day 0-1	Users log in for the first time	Users	40% first-day login rate
Day 1-3	Tier 1 training sessions (basic usage)	Training Lead	70% attendance
Day 3-5	Champions host department intro sessions	Champions	Each department has at least one session
Day 7	First adoption checkpoint	IT Admin / CSM	60% login rate, 30% have joined a meeting
Day 7-14	Tier 2 training for meeting organizers	Training Lead	50% of organizers trained
Day 14	Second adoption checkpoint	IT Admin / CSM	65% login rate, 50% have joined a meeting
Day 21	Migrate recurring meetings to Cymbal Meet calendar integration	Champions	80% of recurring meetings migrated
Day 30	30-day adoption review with CSM	CSM / IT Admin	70% login rate target

Accelerated Onboarding (Seat Expansion)

For organizations adding users to an existing Cymbal Meet deployment:

Day	Activity	Success Metric
Day 0	Licenses provisioned, welcome email sent	100% provisioned
Day 0-2	Self-paced training (link to recorded Tier 1 session)	60% complete training
Day 3	Champion intro session for new users	Session held
Day 7	Adoption checkpoint	60% login rate
Day 14	Follow-up with non-adopters	Targeted outreach sent

Acquired Workforce Onboarding

When onboarding users from an acquired company who may be using a competing videoconferencing tool:

Phase	Timeline	Activity	Success Metric
Discovery	Week 1-2	Audit current tool usage, identify power users, understand workflows	Audit complete
Preparation	Week 3-4	Deploy Cymbal Meet alongside legacy tool, configure SSO, train champions from acquired team	Technical readiness
Soft Launch	Week 5-8	Encourage Cymbal Meet for new meetings; legacy tool remains available	30% of new meetings on Cymbal Meet
Migration	Week 9-12	Migrate recurring meetings, disable new meeting creation on legacy tool	70% of meetings on Cymbal Meet
Sunset	Week 13-16	Remove legacy tool, full transition to Cymbal Meet	Legacy tool decommissioned

Key Principles for Acquired Workforce:

- Do NOT force an immediate switch — this creates resentment and resistance
- Identify 2-3 champions from the acquired team (peer influence is more effective than top-down mandates)
- Acknowledge that the legacy tool has features users value — show how Cymbal Meet addresses the same needs
- Track the acquired cohort separately from existing users to measure progress accurately
- Extend timeline if adoption rate falls below 20% at the Soft Launch checkpoint — forcing the issue will backfire
- Have the acquired team's leadership (not the parent company's) communicate the transition plan

4. Communication Templates

4.1 Executive Sponsor Announcement (Day -7)

Subject: Introducing Cymbal Meet — Our New Videoconferencing Platform

Body:

> *Team,*
>
> *I'm excited to announce that we're adopting Cymbal Meet as our standard videoconferencing platform. Cymbal Meet provides HD video, seamless calendar integration, conference room devices, and mobile support — everything we need for effective collaboration.*
>
> *Starting [DATE], you'll receive login credentials and training invitations. Our IT team has worked to ensure a smooth transition, and [CHAMPION NAMES] in your departments will be available to help you get started.*
>
> *I'll be using Cymbal Meet for our upcoming [MEETING NAME] on [DATE], and I encourage everyone to join from the Cymbal Meet client to get hands-on experience.*
>
> *[EXECUTIVE NAME]*

4.2 Welcome Email (Day 0)

Subject: Welcome to Cymbal Meet — Get Started in 3 Steps

Body:

> *Welcome to Cymbal Meet!*
>
> ***Step 1:*** *Log in at meet.cymbalmeet.com with your company credentials (SSO)* ***Step 2:*** *Download the desktop client: [LINK] (also available on mobile: iOS / Android)* ***Step 3:*** *Join the training session on [DATE] at [TIME]: [MEETING LINK]*
>
> ***Quick Start:***
>
> - *To join a meeting: Click the meeting link in your calendar*
> - *To start an instant call: Open Cymbal Meet > click "New Meeting"*
> - *To schedule a meeting: Use the Cymbal Meet button in your calendar app*
>
> ***Need help?*** *Contact [SUPPORT CHANNEL] or reach out to your department champion: [CHAMPION NAME]*

4.3 Non-Adopter Follow-Up (Day 14+)

Subject: We noticed you haven't tried Cymbal Meet yet — can we help?

Body:

> *Hi [NAME],*
>
> *We noticed you haven't logged into Cymbal Meet yet. We want to make sure there's nothing blocking you from getting started.*
>
> ***Common issues we can help with:***
>
> - *Login or SSO problems → Contact [SUPPORT CHANNEL]*
> - *Can't find the desktop client → Download here: [LINK]*
> - *Not sure how it works → Watch this 3-minute intro video: [LINK]*
> - *Prefer your current tool → Let's talk about how Cymbal Meet handles your workflows: [CHAMPION CONTACT]*
>
> *If you've already started using Cymbal Meet, great — ignore this message!*

5. Training Program

5.1 Tier 1: All Users (30 minutes)

Format: Live session on Cymbal Meet (recorded for on-demand access)

Agenda:

1. Logging in and navigating the interface (5 min)
2. Joining a meeting via link and calendar (5 min)
3. Audio and video settings (5 min)
4. Screen sharing and chat (5 min)
5. Mobile app overview (3 min)
6. Q&A (7 min)

Materials: Quick-start PDF handout, FAQ document, support contact information

5.2 Tier 2: Meeting Organizers (60 minutes)

Format: Live instructor-led workshop on Cymbal Meet

Agenda:

1. Scheduling meetings (calendar integration deep-dive) (15 min)
2. Meeting settings: recording, waiting room, permissions (10 min)
3. Advanced features: breakout rooms, polls, whiteboard (15 min)
4. Conference room device basics for meeting organizers (10 min)
5. Hands-on exercise: schedule and run a meeting with breakout rooms (10 min)

Prerequisites: Tier 1 completion (or equivalent experience)

5.3 Tier 3: IT Administrators (2 hours)

Format: Hands-on workshop (in-person or virtual)

Agenda:

1. Admin Console overview: users, devices, policies, analytics (20 min)
2. User provisioning and SSO configuration (15 min)
3. Device management: deployment, firmware, troubleshooting (20 min)
4. Network requirements and QoS configuration (15 min)
5. Security policies and compliance settings (15 min)
6. Analytics and reporting: adoption metrics, call quality, device health (15 min)
7. Hands-on lab: configure a test policy, deploy a firmware update, pull an analytics report (20 min)

6. Adoption Measurement During Onboarding

Key Metrics

Metric	Day 7 Target	Day 14 Target	Day 30 Target
First login rate	60%	70%	80%
Active users (logged in within last 7 days)	50%	60%	70%
Meeting participation (joined at least 1 meeting)	30%	50%	65%
Meeting scheduling (created at least 1 meeting)	10%	15%	20%
Training completion (Tier 1)	50%	70%	85%
Support tickets	<5% of users	<3% of users	<2% of users

Monitoring and Intervention Triggers

Signal	Threshold	Intervention
Low first-login rate	<40% by Day 7	Resend welcome email; have champions do in-person outreach
Login rate plateau	No increase for 5+ consecutive days	Identify and address specific blockers (SSO issues, client deployment failures)

High support ticket rate	>5% of users by Day 7	Review tickets for common themes; create FAQ or fix systematic issues
Department outlier	Any department >20 points below org average	Champion-led targeted intervention for that department
Zero meetings joined	>30% of logged-in users by Day 14	Check calendar integration; schedule champion-led team meetings

7. Post-Onboarding Handoff

At Day 30, transition from onboarding mode to steady-state adoption management:

1. **Onboarding Report:** Compile final metrics and share with executive sponsor and CSM
2. **Champions Transition:** Shift champions from onboarding support to ongoing adoption (monthly tips sessions, new hire onboarding)
3. **Support Transition:** Route Cymbal Meet issues through standard IT support with escalation to CSM for systemic issues
4. **Legacy Tool Review:** If a legacy tool is still active, set a sunset date based on onboarding results
5. **Ongoing Metrics:** Transition to monthly adoption reporting (see Best Practices Guide, Section 4)

8. Troubleshooting Common Onboarding Issues

Users Can't Log In

Symptom	Cause	Fix
"Account not found"	License not provisioned	Admin Console > Users > verify provisioning
SSO redirect loop	IdP configuration error	Check SAML assertion mapping; verify ACS URL
"Access denied"	Conditional access policy blocking	Check IdP conditional access rules for Cymbal Meet
Password prompt (SSO expected)	User navigated to wrong login URL	Ensure login URL is `meet.cymbalmeet.com/sso`

Calendar Integration Not Working

Symptom	Cause	Fix
No "Cymbal Meet" button in calendar	Add-in not deployed	Deploy Outlook add-in via group policy; enable Google Calendar integration in Workspace admin
Meeting links not generated	Calendar connector offline	Admin Console > Integrations > Calendar > verify status
Wrong time zone on meetings	User profile time zone mismatch	User: Settings > Profile > Time Zone; Admin: check IdP attribute mapping

Desktop Client Won't Install

Symptom	Cause	Fix
Blocked by endpoint protection	Client not allowlisted	Add Cymbal Meet installer hash to allowlist
Insufficient disk space	<500 MB available	Free disk space or install web client only
Admin rights required	Local admin policy	Deploy via MDM/SCCM with elevated permissions

---

Cymbal Meet Customer Success Team — For onboarding planning and support, contact your assigned Customer Success Manager. We recommend scheduling a kickoff call at least 2 weeks before your target onboarding date.
